

School Operating Framework

PROGRAM DESCRIPTION

Transforming the Business of
School Management

SCHOOL OPERATING FRAMEWORK PROGRAM

Research demonstrates that school quality review and continuous school improvement are well-understood disciplines rigorously practiced by outstanding school operators. The best schools in the world are self-evaluating, self-improving institutions able to diagnose their problems and put strategies in place to solve them. Through systematic efforts, great networks bring added capacity to the very best of their schools and then leverage shared resources among them to elevate the system as a whole.

WHO WE ARE

Carter Research is a leading boutique professional services firm that provides strategic advisory, best practice research, new business development, implementation support tools, and operational solutions that address all aspects of the K-12 education industry.
